RELEVANT EXPERIENCE

Secure Parking USA (Client) | Milwaukee, WI

January 2025 - Present

Data Analyst & Web Developer

secureparkingusa.com

- Set up HubSpot CRM and integration with website forms and third party platforms.
- Communicated with various departments to ensure website content, CRM data, and reporting data was regularly updated and accessible to all users.
- Automated tasks and customer communication through complex HubSpot workflows.
- Created systems to efficiently collect & process weekly transactional data into visual reports to facilitate faster response times to regional purchasing trends.
- Maintained two WordPress websites with dynamic content and assisted with a complete rebuild to improve architecture, end-user experience, and loading speed.

Lyss Akemi Tattoos (Client) | San Jose, CA

March 2024 - Present

Website Developer

lyssakemi.co

- Worked directly with the artist to design a logo and color palette that fit with their existing branding from social media for their tattoo shop portfolio site.
- Increased bookings by 20% within the first month of release by optimizing SEO and connecting the website to the artist's existing social media presence.
- Executed the implementation of live social media feeds, an email-connected booking form, and a merchandise shop page integrated with WooCommerce.

T2M Works | Remote

March 2021 - March 2024

Application Developer

t2mworks.com

- Led frontend development of 5 Microsoft Teams apps focused on B2B communication and performance analytics reports for sales and project management teams.
- Cut resource costs by 40% by migrating existing jQuery-based infrastructures to Vue.js, which provided a stable platform for future development projects.
- Decreased bug reports by over 60% and improved customer retention by working with QA and Customer Support team to expedite the resolution of performance issues.
- Participated in agile ceremonies and scrum sessions with the development team to discuss progress on our biweekly sprint goals and keep track of ongoing issues.
- Designed wireframes from client requirements and ideation documents, and translated these into fully functional web applications.
- Ran meetings of cross functional teams and frequently presented demos for new applications and features.
