RELEVANT EXPERIENCE

Lyss Akemi Tattoos | San Jose, CA

Consultant & Lead Engineer

March 2024 – Present

lyssakemi.co

- Worked directly with the artist to design a logo and color palette that fit with their existing branding from social media for their tattoo shop portfolio site.
- Increased bookings by 20% within the first month of release by optimizing SEO and connecting the website to the artist's existing social media presence.
- Implemented all desired features into website including live social media integration, an email-connected booking form with image sending, and an FAQ page.
- Kept overhead costs to \$25/month while researching and incorporating new Wordpress plugins and external products to improve user experience.

T2M Works | Remote

Application Developer

March 2021 – March 2024

t2mworks.com

- Led frontend development of 5 Microsoft Teams apps focused on B2B communication and performance analytics reports for sales and project management teams.
- Cut resource costs by 40% by migrating existing jQuery-based infrastructures to Vue.js, which provided a stable platform for future development projects.
- Decreased bug reports by over 60% and improved customer retention by working with QA and Customer Support team to expedite the resolution of performance issues.
- Participated in agile ceremonies and scrum sessions with the development team to discuss progress on our biweekly sprint goals and keep track of ongoing issues.
- Designed wireframes from client requirements and ideation documents, and translated these into fully functional web applications.
- Ran meetings of cross functional teams and frequently presented demos for new applications and features.

Chairish Every Moment | San Antonio, TX

Consultant & Lead Engineer

August 2021 – December 2021

chairisheverymoment.com

- Launched the online presence of client's new small business by leveraging their existing social media presence to drive traffic to their website.
- Designed a custom logo and assisted client with creating a consistent color scheme to use throughout their website and physical marketing materials.
- Created a Squarespace website to give client complete control over maintenance in a way that was easily accessible to them as a non-tech savvy person.
