RELEVANT EXPERIENCE

Self Employed, Remote – *Freelance Web Developer* **January 2021 – Present**

- Assisted clients in assessing the needs and capabilities of their businesses, and worked with them to plan the scope and overall end user experience.
- Created custom logos, built color palettes and style guides, and edited existing images to align with clients' existing branding and marketing materials.
- Researched and incorporated new products to enhance websites while keeping overhead costs as low as \$25/month.
- Optimized SEO to drive social media interaction, leading to a 20% increase in bookings within the first week of release.
- Deployed web applications onto various public web hosting platforms including BlueHost, Squarespace, and GoDaddy.
- Worked with clients upon project completion to discuss upkeep and lifecycle maintenance for their websites.

T2M Works, Remote – *Application Developer* **March 2021 – March 2024**

- Led front end development of 5 Microsoft Teams apps, ensuring 100% uptime and seamless user experience, leading to improved customer satisfaction.
- Designed wireframes from client requirements and ideation documents, and translated these into fully functional web applications.
- Migrated 2 existing jQuery-based infrastructures to Vue.js, leading to a 40% decrease in resource costs and a stable platform for future development projects.
- Worked in tandem with QA and Customer Support team to expedite the resolution of performance issues and bugs, resulting in an increase in application reliability, overall customer retention, and a decrease of bug reports by over 60%.
- Developed applications using: Vue.js, JavaScript, React, Kendo UI, Microsoft Teams Toolkit, Azure, jQuery, HTML, GULP, CSS, Balsamiq, SQL, REST APIs, Swagger, DataDog, Bootstrap, and Github.
- Actively participated in daily scrum sessions with the entire development team to discuss progress on our biweekly sprint goals and keep track of ongoing issues in a kanban-style management system.
- Attended meetings of cross functional teams and frequently presented demos for new applications so our sales team could accurately describe our offerings to potential and existing clients.
